SPECIFICATION

The HMKST hooks are the original Henriksen developed quick release, off-load lifting hooks. For decades this product has proven to be the most reliable, best and safest launch and recovery lifting hook on the maritime market, and still continues to live up to its reputation. Available as an accessory is the HMKST release handle protection bar. This gives the handle additional protection as well as a hand rail for the operator to hold on to during operations in rough conditions.

- The ""NUC"" regulations require lifeboats to be able to be released quickly.
- Release is possible when the load becomes zero
- Built in stainless steel, each unit comes with a DNV certificate and meets IMO/SOLAS requirements.
