CARACTERISTICS

MARSILI HYDRAULIC TWIN CYLINDERS - TORQUE: 610 MKG
Réf. **CL2B101**

- Torque : 630 m.kg

Dangerous material : non
Weight :

SPECIFICATION

This type of actuator is very robust and is particularly recommended when the rudder maneuver requires a large ""torque"", especially on medium and large workboats, such as trawlers, tugs, etc.

- Without support plate
