Bronze bearing 1" x 1"1/2

Réf : **BAG25403810B**

Bronze hydrolubes are mechanical parts used in industrial applications and hydraulic equipment. They are made from bronze and are designed to operate with a film of lubricating water, giving them high wear resistance and a longer life than traditional metal bushings.

CARACTERISTICS

BRONZE BEARING 1" X 1"1/2

Réf. **BAG25403810B**

Dangerous material : non
Weight :

- External diameter : 1-1/2 ""
- Internal diameter : 1 ""
- Length : 4 ""
- Material : Brass

SPECIFICATION

Bronze hydrolubes are commonly used in applications where lubrication is difficult or impossible to maintain, such as equipment submerged in water or corrosive environments. They are also used in applications that require low friction and high load carrying capacity, such as machine tools and internal combustion engines.
