SPECIFICATION

The JETFLOAT modular swimming pool has been installed to provide the community of Gosier and the surrounding schools with the opportunity to offer swimming lessons in the open sea while maintaining a safe and supervised environment, meeting swimming pool standards.

Young children can take advantage of the benefits of the Caribbean Sea to learn how to swim.

This modular pool has the advantage of being quickly disassembled and stored in the event of a cyclone in the region.

- 1 large pool measuring 25x10m, with 250m² of swimming surface and swimming lanes.
- 1 small pool measuring 5x10m, with 50m² of swimming surface.
- Over 280m² of resting platform.
- A 6m long aluminum access walkway with wooden decking and guardrails.
- Key-locked security gate.
- 6 approved ladders.
- Galvanized guardrails around the perimeter with safety net.
- Galvanized steel anchoring brackets at the shore with cables.
- High-density polyethylene (HDPE-5261Z) cubes, UV-resistant and impact-resistant, manufactured to ISO standards.
