# Super protective film - 400 ml

Réf : **Q30400**

Superior, transparent and flexible protective film that provides an effective seal against rust, corrosion and wear. Particularly effective for protecting printed circuit boards, electrical connectors and contactors.

Classic delivery

**Public price TTC**
**15.35 €**

## CARACTERISTICS

### SUPER PROTECTIVE FILM - 400 ML
Réf. **Q30400**

- Units in box : Aerosol

**Dangerous material :** oui
**Weight :**

## SPECIFICATION

- Protects all sensitive boat components and parts
- Easy to remove like a second skin
- Salt spray tested: 500 hours of resistance
- Dielectric strength greater than 2000 V
- Elongation at break up to 1000
- UV-resistant for 12 to 24 months
- Shake before application

The film is stretchable and removable, suitable for all surfaces, and restores a like-new appearance to various components, including engines, hoses, cables, stainless steel, and aluminum. It seals joints and provides waterproofing through its flexible and durable film. It forms a protective film to ensure protection and sealing on printed circuits and electrical connectors in extreme, humid environments. It has dielectric properties (over 2000 Volts) and UV resistance. It is particularly effective for electric motors and extends the lifespan of devices when sprayed onto the connection. It withstands UV exposure for 12 to 24 months. Shake well before use. In aerosol form, Q30 features a 360° valve, allowing the can to be completely inverted and used in challenging-to-reach places with the aerosol head facing downward. These products are REACH certified.
