Réf. **MC250Y**

Dangerous material : non

Weight : 0,35 kg.

Catalog page : 508

- Dimensions : 250 mm
- Diameter : 25 mm
- Material : Stainless steel

SPECIFICATION

Stainless steel handrails are tailor-made to suit the specific requirements of each vessel. Whether for gangways, decks, stairways or other potentially hazardous areas, they are designed to meet the specific safety needs of each space while integrating harmoniously into the overall design of the vessel.

Finally, in addition to their functional and aesthetic role, stainless steel handrails for ships also meet international safety standards for navigation. Naval architects, engineers and designers work closely together to ensure that each handrail complies with current maritime regulations, guaranteeing the protection and safety of passengers and crew.
