CARACTERISTICS

CHARGE CONTROLLER MPPT 40 A - 12/24 V

Réf. **MPPT40G**

Dangerous material : non
Weight : 2,18 kg.

- Dimensions : 189 x 255 x 69 mm
- Charge current : 40 A
- Weight : 1,8 kg
- Max. power : 520 / 1040 W
- Maximum voltage : 100 V

SPECIFICATION

MPPT Charge Controllers

These single-output controllers are designed to enhance the efficiency of solar panels by utilizing their maximum voltage.

Conventional controllers lower the voltage while maintaining the charging current. MPPT controllers also lower the panel voltage but compensate for this voltage drop by increasing the charging current.

- LCD Control Screen
- Real-time display in digital, graphic, and text modes
- Multiple battery and charging options
- Efficiency: 99.9%
- 2 USB outputs
- Electronic protection against overcharging
