Réf. **MACCS8L**

- Built-in dimensions : 168 x 133 x 40
- Homologation : Approved by the French Merchant Navy

Dangerous material : non
Weight : 0,96 kg.
Catalog page : 452

SPECIFICATION

Regulations require fishing vessels to be equipped with a water detection device approved by the French Merchant Navy, including line monitoring (Ref. VIGIFLOBSL) combined with a MACCS 8L alarm panel, which is also certified. Designed to ensure reliable detection on small to medium-sized vessels, this Division 361-compliant equipment can be installed on fishing vessels up to 24 metres in length as well as certain service vessels.

- MACCS 8L system components:

  - MACCS LED: Complete visual and audible signalling box - L x W x H: 110 x 110 x 44.5 mm - Integrated buzzer, multi-language display (French, English)
  - MACCS CPU: 8-input processor - L x W x H: 168 x 133 x 40 mm

- Quick start-up and very simple, intuitive operation, no programming required
- 2 power sources 9-32 V DC with alarm
- Configurable parameters: Normally Open / Normally Closed - With monitoring (MMF requirement) / Without line monitoring - Time delay 0/10/20/30s
