SPECIFICATION

Combining lightness and durability, it can be deployed by a single person, even under challenging conditions. It provides full-body support and ensures safe horizontal lifting, minimizing post-rescue risks.

- Versatile use: access ladder and medically approved horizontal lifting device
- Easy attachment to the boat: 4 to 7 securing loops
- Ultra-lightweight: up to 80% lighter than traditional nets
- Net width: 1.2 m
- Easy deployment: operable by 1 to 2 people
- Compact storage: 50% less space than a standard net
- Safe working load: up to 23 people
- Vertical webbing: each strap tested to over 1000 kg (2204 lbs)
- Mesh: each mesh tested to over 500 kg (1102 lbs)
- Materials: high-strength polyester webbing, aluminum components, marine-grade plastic, and reinforced metal
- Cover: bright red-orange PVC
- No annual maintenance required
- Designed to meet SOLAS requirements
