CARACTERISTICS

RESIN BEARING 45 X 2"3/8

Réf. **BAG456032R**

Dangerous material : non
Weight :

- External diameter : 2-3/8 ""
- Internal diameter : 45 mm
- Length : 180 mm
- Material : Phenolic resin

SPECIFICATION

Resin bushings are products used in various industrial and mechanical applications to provide effective lubrication. They are made from a special resin, usually polymeric, which has lubricating properties when in contact with water or other liquids.
