SPECIFICATION

SOLAS Immersion Suit Inspection and Servicing

Immersion suits are essential maritime safety equipment. Their condition and availability must be monitored to ensure that they perform effectively in an emergency.

We offer **SOLAS survival suit inspection and servicing at our workshop**, upon request for a quotation.

Periodic Inspections and Regulatory Requirements

For applicable vessels, Article 331-1.03 of the French regulations on ship safety requires immersion suits to be inspected in accordance with IMO Circular MSC/Circ.1114, at intervals not exceeding three years. More frequent inspections may be necessary for suits over ten years old, in accordance with the manufacturer's recommendations.

The regulations also specify the conditions under which these inspections must be carried out: they must be performed by an authorized service provider, and the results must be recorded in the inspection record kept on board.

Request a Quotation

Contact us to discuss the servicing of your survival suits. Your quotation request will help us identify the equipment concerned and

determine the arrangements for inspection and servicing at our workshop
