- Length : 295 mm
- Model : 61112302 - BC Supreme 12 V - 20 A
- Weight : 2.4 kg
- Power : 350 W
- Height : 86 mm
- Width : 206 mm

SPECIFICATION

The Supreme charger is easy to programme for AGM , GEL, Lead acid and Lithium batteries. The charger can handle input voltages from 90 to 265 VAC (50 / 60 Hz) and can therefore be used worldwide.

Features:

- Designed to charge three independent batteries
- Also suitable for one or two batteries
- Batteries can differ in capacity (Ah)
- Programmable for AGM, GEL, Lead acid and Lithium batteries
- Temperature sensor standard
- Temperature sensor protects against risk of gas production
- Automatically adjusts supply voltage for world-wide use (90-265 VAC)
- Works with small gasoline or diesel generators
- Complies with CE and ABYC standards

Benefits:

- Fast charge even with low input voltage
- Each output can be programmed differently

- Battery connection easily accessible, AC power cord supplied
- Quick install
- Quiet - no hum from transformer
- Maximizes battery life time
- Outstanding price - performance ratio
