

Galvanic isolator WP-GI Whisperpower 16A

Réf : **WP60110140**

A small metal enclosure containing electronics and semiconductors. It optimizes the lifespan of sacrificial anodes and protects metal components on the boat from galvanic corrosion. It prevents stray currents from the shore reaching the boat. A WhisperPower galvanic isolator is connected to the anode and the onboard equipotential system. It allows a nominal current of 30 A or 60 A to pass through.

CARACTERISTICS

GALVANIC ISOLATOR WP-GI WHISPERPOWER 16A

Réf. **WP60110140**

Dangerous material : non

Weight : 0,10 kg.

- Charge current : 16 A
- Frequency : 50 Hz
- Protection rating : IP67
- Maximum current : 1600 A / 20 ms
- Model : 60110140
- Weight : 1.2 kg
- Depth : 200 mm
- Height : 60 mm
- Width : 120 mm
