CARACTERISTICS

WP-ANL-300 POWER FUSE WHISPERPOWER 48 V 300 A M10 BOLTS
Réf. **WP50212035**

- Thread : M10
- Model : 50212035

Dangerous material : non
Weight : 0,20 kg.

SPECIFICATION

ANL fuses are suitable for 12V, 24V, and 48V battery systems. Similar to MEGA-type fuses, they are primarily intended for protection against short circuits due to their relatively slow-acting behavior. ANL fuses are easy to replace due to the 'fork' design of the terminals. Main applications include battery, alternator, and wiring protection. ANL fuses have a slightly higher interrupting capacity than MEGA fuses, ranging from approximately 2.5 to 3 kA. Therefore, they are not recommended for use on large battery banks.
