CARACTERISTICS

TRANSFER PUMP 23610-3103 24 V - 2460 L/H

Réf. **JMXP24**

Dangerous material : non
Weight : 3,80 kg.

- Dimensions : 220 x 120 x 85 mm
- Consumption : 11 A
- Flow : 25 L/min
- Maximum flow : 45 L/min
- Diameter : 25 mm
- Outlet diameter : 1/2 ""
- Inlet diameter : 1/2 ""
- Max. suction head : 2.5 m
- Length : 220 mm
- Model : Maxi Puppy 3000
- Weight : 3,4 kg
- Height : 85 mm
- Width : 120 mm
- Fuse protection : 15 A
- Type of pumps : electric pump
- Maximum HMT height : 12 m
- HMT height : 2 m

SPECIFICATION

The Jabsco Maxi Puppy 3000 bilge pump is a powerful and versatile solution for marine, industrial and mobile applications. With a high flow rate of 45 L/min, this electrically driven pump is designed for continuous use, based on the principle of a flexible elastomer impeller, capable of tolerating the occasional passage of foreign bodies.

Manufactured with a bronze body and a flexible nitrile impeller, this pump is ideal for a wide range of uses, including deck washing, bilge emptying, ballast transfer on pleasure boats, water supply for caravans and motor homes, and waste water evacuation in transport vehicles. It is also suitable for pumping hydrocarbons, draining water from refrigeration tanks, and equipping public works machinery.

Designed to operate on a 24-volt DC power supply, the Jabsco Maxi Puppy 3000 guarantees optimum performance when connected to

well-charged batteries or a DC power source with adequate amperage. Its nitrile wheel is optimised for liquid temperatures between 10 and 82.2°C. Thanks to its ability to handle solids down to 6-7 mm, this pump is ideal for demanding environments without the need for a strainer, ensuring maximum efficiency.

Whether for marine, industrial or vehicle maintenance applications, Jabsco's Maxi Puppy 3000 bilge pump offers a reliable and durable solution to your pumping needs.
