SPECIFICATION

The model 6512 electronic control board is designed to integrate with various control boxes, including the model 6555, offering an LED display to indicate the actual position of the propulsion machinery. With a central 4-line digital display, this base provides essential information on propulsion systems, while allowing customisation of buttons and switches for up to 12 on-board functions. Designed for indoor use, it provides precise, adaptable control to meet the specific needs of marine operators. When ordering, please specify the control head required for this base.
