- Weight : 1,30 kg

SPECIFICATION

- Its design allows for installation on all types of vessels.
- Breakage tests provide safety up to 2,270 kg.
- Approved to the latest CE standards, EN795.
- Low maintenance as the moving parts are self-lubricating.
- Materials used include anodized aluminum 6082/T6 for the rail and anodized aluminum 6082 and stainless steel 316 L for the carriage.
- Weights:
- Rail per meter: 1.3 kg
- Carriage: 0.35 kg

Each installation is specific to the vessel: a plan must be provided to accurately define the components of the system.
