SPECIFICATION

The NORMA range of switchboards provides control and monitoring functions for filament or LED navigation lights. They can monitor and control up to 48 navigation lights, in 24 Vdc or 230 Vac and with a power ranging from 0.5 W to 65 W.

- Detection of anomalies: filament breakage (filament bulbs), short-circuit, power supply fault, fuse fault
- Hour meter and lifetime alarm for LED lights
- Dual power supply with manual or automatic switching: main emergency power supply with alarm
- Mute button
- Dimming of light intensity
- User customisation of the display
