CARACTERISTICS

KEEL COOLER WITH SCREW FIXING AND ZINC PROTECTION - MAX THICKNESS 40 MM

Réf. **E50361Z**

- Thread diameter : 38 mm
- Model : Keel cooler with short thread, with zincs

Dangerous material : non
Weight : 2,68 kg.
Catalog page : 207

SPECIFICATION

The Frigomatic keel cooler system has two main advantages: Its design does not interfere with your navigation, and it uses the sea water outside the boat to cool the refrigerant, allowing for a very high heat exchange/heat flow rate, which guarantees good performance.
