- Model : Norsap 4000 Impulse M
- Weight : 150 kg
- Height : 700 mm
- Seating height : Fixed 700 mm
- Footrest : yes
- Upholstery : Natural Leather

SPECIFICATION

The new electric plug-and-play system ensures safe, easy-to-use maintenance. The chair's design allows full integration of client components and equipment, and ensures long-term operation. Spacious armrests with room for internal cabling make it easy to install most equipment and accessories.
The series fully complies with the strict ergonomic requirements found in the NORSOK regulations. Our chairs are designed to comfortably fit 90% of all users according to the ISO7250 Standard.
On the Norsap 4000 Impulse, every part of the arms and leg can be adjusted, allowing true accommodation for 90% of users. In order to keep it simple, we made the Norsap Quicksize function, enabling all six electric motors to simultaneously run and adjust arm and leg parameters based on your height. This makes it a breeze to RESET and RESIZE the operator's chair after the previous shift. Norsap Quicksize may also be used for complimentary adjustments to the arms and leg, speeding up the process when taking over the chair after a shift.
As an add-on to Norsap Quicksize, the chair may be fitted with a Norsap personal memory panel that allows up to four unique save slots for any combination of chair adjustments. Use this for teams where one or more user is given a personal saving slot for their body size. The Norsap Personal Memory panel recalls any previously saved chair size with one button press.
The XL column has a large footprint with four mounting holes for secure fastening to the deck. This is designed to be integrated with the Active or Impulse deck rail that can be delivered as a flush or top-mounted deck rail.
Standard adjustments are front and back tilt, forearm and upper arm adjustment, electrical height adjustment, flip-up armrests and electrical footrest. Another available option is lumbar support.

Other available options are seat belts, lumbar support, logo embroidered front and foil logo on the backrest. The chair comes in black leather as standard.
